

## **Counterbalance Forklift Training Victoria**

Counterbalance Forklift Training Victoria - Demand is always high for our popular Counterbalance Forklift Truck Training courses. A Counterbalance forklift is a forklift along with a weight that counters the balance, allowing the load's weight to be distributed equally across the arms of the forklift. Counterbalance forklifts are made so the weight on the lift is counterbalanced by the weight behind the centre of gravity. The load is projected out from the equipment's front so it is visible to the forklift driver. This particular type of forklift truck should just be utilized on prepared surface or on level, stable ground.

Forklift operators are required to obtain training which would allow them to better understand the proper or right way across the forklift arms. The trainee would learn to correctly lower and raise the load vertically and how to tilt the mast of the lift truck, moving the mast between 5 and 15 degrees both forwards and backwards. People training would be taught the RTITB standards required for safely operating the forklift. Trainees will likewise know the types of attachments for the forklift arms.

Kinds of Counterbalance Forklifts:

### **Walkie Pallet Trucks**

Walkie Pallet Truck is a counterbalance forklift suitable for getting into spaces that are small and cramped. This particular lift is highly maneuverable and could access virtually whichever tight space.

### **Walkie Stackers**

The Walkie Stacker is a different forklift that varies slightly from the Walkie Pallet truck in terms of its lift height. This equipment is designed to access tighter areas and has extra lift capabilities for high stacking. Neither of the Walkie line of lifts could be ridden. The driver has to walk behind them.

### **Rider Pallet Trucks**

Rider Pallet Trucks are made to be ridden. These riding lifts are perfect for dock unloading and loading.

### **Wave Work Assist Vehicle**

The counterbalance forklift referred to as the Wave Work Assist Vehicle can reach heights up to 17 feet.

### **Sit Down Counter Balanced Trucks**

The Sit-down Counterbalance Forklift is built in three-wheel and four-wheel forklift designs. These durable and tough trucks are made to be ridden.
