

## Aerial Lift Training Victoria

Aerial Lift Training Victoria - An aerial work platform is a mechanized access platform. This particular machinery provides access to otherwise inaccessible places for equipment or people. Also called an aerial device or elevating work platform, the device is often used to access high places. Construction and maintenance employees usually should make use of aerial work platforms on the job. They are used by firefighters for emergency access.

The aerial work platform is designed to temporary application, providing access to high areas. They are designed to be operated by one person, with the capability of lifting weights of less than one ton. Several kinds have higher load limits. There are different kinds of aerial work platforms; like for instance, there is a "scissor lift" and a "cherry picker".

Various aerial work platforms are available equipped with compressed air connectors for power tools or electrical outlets. For specialist jobs, like lifting frames for window glass, an aerial work platform could come with special equipment.

People who want to operate an aerial lift device must go through training. Normally, the members of a Health & Safety Committee and their representatives are responsible for the inspection of each machine and work places and are likewise needed to undergo training. People training would learn how to use an aerial lift machine. They will likewise learn the regulations that apply to the safe use of these machinery. Regulations vary from province to province, and within federally regulated worksites.

Employees who work near or are required to be lifted by an aerial lifting machine should know all the potential hazards. An Aerial Lift Training Video could be shown in a general safety session to educate all of the workers who are lifted by them or work near them.

Aerial Lift Training Program includes modules focused on the following: Aerial Lift Devices and Operating Controls; Hazard Identification; Platform Positioning & Park Positioning and Pre Operational Checks for Aerial Lift Devices. The particular program is meant to train staff on safely utilizing self-propelled, elevated work platforms and self-propelled, boom supported, elevated work platforms. A certificate would be given to workers who finish the program, signed by somebody qualified to be able to verify the successful completion of a hands-on practical exam.
