

## Aerial Lift Train the Trainer Victoria

Aerial Lift Train the Trainer Victoria - The Aerial Lifts Train the Trainer Certification Program teaches trainers how to effectively train operators in safe industrial mobile equipment operation. Trainers are provided with in-depth instruction on aerial lift equipment. The program is offered on an open enrollment basis and delivered at select training places. Before the certification, trainers are evaluated and scored based on their knowledge and demonstrated skills.

The Aerial Lifts Train the Trainer Certification Program emphasizes practical learning. As the number one training provider in the industry, we offer the best hands-on training possible through chances to practice techniques and concepts learned in the classroom. Together with hands-on experience, trainers develop general understanding of instructional techniques and machinery theory, field and classroom communication skills, and ability to successfully train and assess operators. Trainers will gain an understanding about what traits make a successful trainer.

The Aerial Lifts Train the Trainer Program also teaches the proper methods necessary in order to express the correct information within the classroom and field environment. There are three factors of machine operation that the trainer must learn how to convey to operators: what to perform; how to do it; and the reason why it needs to be carried out.

In the program, trainers will be given the latest, detailed reference material to better help them convey the information to equipment operators. The guidebooks utilized, include detailed information regarding all aspects of industrial mobile machine operator training. Included in the package are training aids that provide a visual reference so as to enhance the learning experience. The equipment-specific training products contain important materials intended for both the operator and the trainer: videos/DVD's, overhead transparencies, safety message posters, equipment models; digital training aids and stability pyramid.
