

Boom Lift Training Victoria

Boom Lift Training Victoria - Elevated work platforms, also called aerial platforms, enable workers to perform tasks at heights that would otherwise be not reachable. There are different kinds of lifts intended for different site applications and conditions. If operated carelessly, elevated work platforms could result in serious injury or death. The most common reasons for related accidents are electrocution, falls, tip-overs and crushed body parts. Lift operators should be completely trained in techniques to be able to prevent accidents during the operation of lifts.

Aerial Lift Safety course is intended for those who have to operate the devices more effectively and safely. The course provides thorough instruction about the most used lifting devices in the industry.. Types of lift covered comprise boom supported, scissor and articulating aerial lifts. The video presents the proper procedures operators must follow. Instruction focuses on pre-operational inspection, protection against falls, safe driving procedure and stability of the device.

The boom lift training program will help to deal with equipment reliability and employee safety, using materials which are completely compliant with your regional and local requirements and regulations. Course management and training techniques would be taught. The trainer will likewise know the technical aspects of aerial lift safety.

Both classroom training and practical training are parts of the Aerial Platform/Boom Truck Training course. Both sessions should be successfully completed for the participant to be given a certificate of achievement.

The self-propelled boom-supported elevating work platforms are different from the self-propelled elevating work platforms in that they are able to position their work platforms totally beyond the base of the machinery. The theoretical component of the training is virtually identical for both types. The practical training part can be completed faster if just one kind of machine is utilized.

Elevating Work Platform Training Program Objectives:

For safely operating Boom-Type Elevating Work Platforms and Self-Propelled Elevating Work Platforms, boom lift training will help operators use their equipment more effectively and will reduce the possibilities of accidents in the workplace. Trainees will review of business policies and applicable regulations, discuss Due Diligence, study Criminal Negligence and consequences to trainers, employers, supervisors and employees. Participants would review machine features, operating procedures, stability, charging/fueling procedures and parking. Site-specific safety concerns would be addressed.
